

# ELECRAFT KXBC3 BATTERY CHARGER INSTALLATION INSTRUCTIONS ERRATA

Rev. A2-2 October 31, 2012

**THESE MANUAL CORRECTIONS MUST BE MADE BEFORE YOU BEGIN ASSEMBLY OR  
YOUR KXBC3 MAY NOT FUNCTION CORRECTLY**

1. Page 1, Specifications, change the specification for External Power Supply to read:

13.8 VDC (minimum) to 15 VDC at 500 mA for receive only when charging; approx. 3 amperes when transmitting and charging.

2. Page 3, Numbered step 3, add 8 HR as follows:

Turn the ☉ **VFO A** knob to select *CHG 4 Hr, 8 Hr, 12 Hr or 16 Hr...*

3. Page 4, change the first sentence of the description of the LO SPPLY error message to read:

The external power supply voltage is less than 13.8VDC.
